

U.S. DEPARTMENT OF COMMERCE  
National Oceanic and Atmospheric Administration  
National Weather Service  
**MARINE WEATHER SERVICE CHART**  
APALACHICOLA, FL TO MORGAN CITY, LA  
NOT TO BE USED FOR NAVIGATION

**LEGEND**

- ⊙ NOAA WEATHER RADIO TRANSMITTER SITE
- COASTAL MARINE AUTOMATED NETWORK (C-MAN) STATION
- △ NON NWS MARINE OBSERVING STATION
- ⚓ WEATHER BUOY

**DIAL-A-BUOY**

Dial-A-Buoy gives mariners an easy way to obtain reports via a cell phone. Dial-A-Buoy provides wind and wave measurements taken within the last hour at National Data Buoy Center (NDBC) buoy and Coastal Marine Automated Network (C-MAN) stations. The stations operated by NDBC, part of the National Weather Service, are located in the Atlantic, Pacific, Gulf of Mexico, and the Great Lakes. The Dial-A-Buoy service has since expanded to include stations owned and operated by other organizations including the United Kingdom Met Office and Environment Canada. To access Dial-A-Buoy, dial (228) 688-1948 using any touch tone or cell phone. For internet users, more information is at: <http://seaboard.ndbc.noaa.gov/dial.shtml>

**NATIONAL WEATHER SERVICE TELEPHONE NUMBERS**

OFFICE	TELEPHONE NUMBERS
MOBILE, AL	251-633-6443
NEW ORLEANS, LA	504-465-9215
TALLAHASSEE, FL	850-942-8833

**COASTAL FORECAST AREAS**  
COASTAL FORECAST AREAS ARE ISSUED FOR THE FOLLOWING AREAS:

SUWANNEE RIVER, FL TO APALACHICOLA, FL  
APALACHICOLA, FL TO DESTIN, FL  
DESTIN, FL TO PENSACOLA, FL  
PENSACOLA, FL TO PASCAGOULA, MS  
PASCAGOULA, MS TO S. W. PASS OF THE MISSISSIPPI RIVER, LA  
S.W. PASS OF THE MISSISSIPPI RIVER, LA TO LOWER ATCHAFALAYA RIVER, LA  
LOWER ATCHAFALAYA RIVER, LA TO CAMERON, LA

**MARINE WEATHER REPORTING PROGRAM**

The National Weather Service (NWS) has established a Nationwide Mariner Report Program — MAREP — to help improve marine warnings and forecasts. Through this cooperative effort, professional mariners make radio reports of sea and wind conditions to NWS marine forecasters. If you would like to participate or learn more about this volunteer program, please call:

NWS Mobile 251-633-6443  
NWS New Orleans 504-522-7330  
NWS Tallahassee 850-942-8833

NOAA WEATHER RADIO BROADCASTS

CITY	STATION	FREQUENCY	BROADCAST TIMES
Baton Rouge, LA	KHB-46	162.40 MHz	Continuously, 24 hrs a day
Buras, LA	WXL-41	162.475 MHz	Continuously, 24 hrs a day
Eastpoint, FL	WWF-86	162.50 MHz	Continuously, 24 hrs a day
Gulfport, MS	KIH-21	162.40 MHz	Continuously, 24 hrs a day
Mobile, AL	KEC-61	162.55 MHz	Continuously, 24 hrs a day
Morgan City, LA	KIH-23	162.475 MHz	Continuously, 24 hrs a day
New Orleans, LA	KHB-43	162.55 MHz	Continuously, 24 hrs a day
Panama City, FL	KGG-67	162.55 MHz	Continuously, 24 hrs a day
Pensacola, FL	KEC-86	162.40 MHz	Continuously, 24 hrs a day
Tallahassee, FL	KIH-24	162.40 MHz	Continuously, 24 hrs a day
Bogalusa, LA	WNG-521	162.525 MHz	Continuously, 24 hrs a day

These VHF-FM radio stations, locations shown on the map, are managed by the National Weather Service. Broadcast, updated every 3 to 6 hours and amended as required. Broadcast contents vary, but in general contain the following types of information.

1. Descriptions of the weather patterns affecting the southern part of the United States.
2. Regional and state forecasts with outlook for the third day.
3. Marine forecasts and warnings for coastal waters.
4. Weather observations from selected National Weather Service and U.S. Coast Guard stations.
5. Short term forecasts.
6. Local weather observations and forecasts.
7. Watches, warnings, statements and bulletins concerning adverse and severe weather.

NOAA Weather Radio (NWR), Specific Area Message Encoder (SAME), and NWR Coverage

NOAA Weather Radio broadcasts on 162.40, 162.425, 162.45, 162.475, 162.50, 162.525 and 162.55 MHz can usually be received 20-40 miles from the transmitting antenna site, depending on terrain and the quality of the receiver used. Where transmitting antennas are on high ground, the range is somewhat greater, reaching 60 miles or more. The VHF-FM frequencies used for these broadcasts require narrow-band FM receivers. The National Weather Service recommends receivers having a sensitivity of one microvolt or less for a quieting factor of 20 decibels.

Some receivers are equipped with a warning alarm device that can be turned on by means of a tone signal controlled by the National Weather Service office concerned. This signal is transmitted for 13 seconds preceeding an announcement of a severe weather warning.

In addition, the Federal Communications Commission (FCC) has approved the special SAME code to delineate marine areas. Mariners with NWR receivers equipped with SAME should check out:

<http://www.nws.noaa.gov/om/marine/wxradio.htm>  
for information on how to program their receivers.

For a listing of marine area and zone codes for SAME, go to:  
<http://www.nws.noaa.gov/geodata/catalog/wsom/html/marinewreas.htm>

Radiofax charts for the Gulf of Mexico, Caribbean, Tropical Atlantic, and Tropical East Pacific are posted at:

<http://weather.noaa.gov/fax/gulf.shtml>

BROADCASTS OF MARINE WEATHER FORECASTS AND WARNINGS BY MARINE RADIOTELEPHONE STATIONS

City	Station	Frequency, kHz/MHz	*Broadcast times (local) CST
St. Petersburg, FL	NME (USCG)	~ CH 22A *# 2670 kHz	0700, 1700 0820, 2120
Mobile, AL	NOQ (USCG)	~ CH 22A *# 2670 kHz	0420, 0620, 1020, 1620 0420, 0620, 1020, 1620
New Orleans, LA	NMG (USCG)	~ CH 22A *# 2670 kHz NAVTEX(G) 518 kHz	0435, 0635, 1035, 1635 0435, 0635, 1035, 1635, 2350 0100, 0500, 0900, 1300, 1700, 2100

USCG VHF broadcasts normally contain coastal forecasts.  
HF broadcasts normally contain offshore forecasts.  
Marine warnings are broadcast upon receipt.

\* Broadcast 1 hour later during Daylight Saving Time.  
\* Preceded by announcement on 2182 kHz  
~ Preceded by announcement on ch. 16.  
# Single Sideband, suppressed carrier, carrier frequency.

EXPLANATION OF MARINE ADVISORIES/WARNINGS

SMALL CRAFT ADVISORY: Issued to alert mariners to sustained winds 20 to 33 knots and/or forecast seas 7 feet or greater that are/is expected for more than two hours.

GALE WARNING: A warning of sustained winds or frequent gusts in the range of 34 to 47 knots inclusive, either predicted or occurring, and not directly associated with a tropical cyclone.

STORM WARNING: A warning of sustained winds or frequent gusts in the range of 48 to 63 knots inclusive, either predicted or occurring, and not directly associated with a tropical cyclone.

HURRICANE FORCE WIND WARNING: A warning of sustained winds or frequent gusts of 64 knots or greater, either predicted or occurring, NOT associated with a tropical cyclone.

SPECIAL MARINE WARNING: Issued for severe local storms, for winds 34 knots or greater, and/or hail three-quarters inch in diameter or larger, and/or waterspouts.

TSUNAMI WATCH: Tsunami expected in 3 to 6 hours.

TSUNAMI WARNING: Tsunami expected within 3 hours.

TROPICAL STORM WARNING: Issued for a tropical cyclone in which the maximum sustained surface wind ranges from 34 to 63 knots inclusive.

HURRICANE WARNING: Issued for a tropical cyclone in which the maximum sustained surface wind is 64 knots or greater.

NOTE: A "TROPICAL STORM WATCH" or "HURRICANE WATCH" is issued whenever a tropical storm or hurricane becomes a threat to a coastal area. The "WATCH" is not a warning, but indicates that the tropical cyclone is near enough that persons in the area covered by the "WATCH" should listen to their radios for subsequent advisories and be ready to take precautionary action in case tropical storm or hurricane warnings are issued.

SAFETY RULES FOR SMALL BOAT OPERATORS

1. Never leave shore without an approved life preserver for each person aboard.
2. Check the weather before departure. Leave an itinerary of your trip with a responsible individual.
3. Equip your vessel with safety flares...know how to use them...replace outdated items.
4. Know the limitations of yourself, your crew, and your vessel. Do not leave unprotected waters in small boats when severe weather is occurring or is forecast.
5. If your vessel cannot reach a safe harbor prior to the arrival of severe weather...close all hatches, keep all unnecessary crew below and away from grounded metal objects. Sailing vessels should reduce sail immediately and be prepared to change course to head into possible strong outflow winds produced by thunderstorms.
6. Navigation is crucial particularly for the Gulf of Mexico where shoal waters, reefs, and obstructions abound. Research your trip thoroughly and prepare an approach route to your harbor.
7. Learn the rules of navigation...they may save your life. Never cross bows of large commercial vessels or barges.
8. It is often safer to remain offshore than to attempt to to enter unfamiliar shallow waters or harbors at night or during periods of reduced visibility.

WEATHER RULES FOR SAFE BOATING

Before setting out:  
Obtain the latest available weather forecast for the boating area. The NOAA Weather Radio continuous broadcasts (VHF-FM) are the best way to keep informed of expected weather and sea conditions. If you hear on the radio that warnings are in effect, don't venture out on the water unless you are confident your boat can be navigated safely under forecast conditions of wind and sea.

While afloat:

1. Keep a weather eye out for: the approach of dark, threatening clouds, which may foretell a squall or thunderstorm; any steady increase in wind or sea; any increase in wind velocity opposite in direction to a strong tidal current. A dangerous rip tide condition may form steep waves capable of broaching a boat.
2. Check radio weather broadcasts for latest forecasts and warnings.
3. Heavy static on your AM radio may be an indication of nearby thunderstorm activity.
4. If a thunderstorm catches you while afloat, you should remember that not only gusty winds but also lightning poses a threat to safety.  
– stay below deck if possible.  
– keep away from metal objects that are not grounded to the boat's protection system.  
– don't touch more than one grounded object at the same time (or you may become a shortcut for electrical surges passing through the protection system).  
– put on a life jacket and prepare for rough sea conditions.

RADIO WWW/WWVH STORM INFORMATION BROADCASTS

HIGH SEAS STORM INFORMATION is provided mariners through a cooperative program of two Department of Commerce agencies: the National Weather Service of the National Oceanic and Atmospheric Administration and the National Institute of Standards and Technology. Bulletins are compiled by the National Weather Service and broadcast every hour by the National Institute of Standards and Technology's Frequency and Time Broadcast Services Radio Stations – WWV, Fort Collins, Colorado and WWVH, Kauai, Hawaii. These are the radio stations that sailors and others listen to for daily time checks.

WWW (FORT COLLINS, CO)

FREQUENCIES : 2.5, 5, 10, 15, 20 MHz

The weather broadcast is in 45-second segments separated by a 15-second interval.

TIMES OF BROADCAST

8 minutes past the hour  
9 minutes past the hour

BROADCAST AREA  
Storm information for western North Atlantic, including Gulf of Mexico and Caribbean Sea.
